Creating a new lawn:

Spring time is the best time to start a new lawn, as it is nice and warm, with plenty of water. However lawns can still easily be made throughout Summer and Autumn

We have a simple 4 step process to putting down a great new lawn.

1. If weeds are a problem, spray with Round up or equivalent and leave for about 3 weeks.
2. Level area and add top soil if necessary. If your soil is of poor quality add some Blood & Bone (30g/m²).
3. Apply lawns seed (30g/m²). Lightly rake over once seed is applied.
4. Water your new lawn twice a day once it has sprouted, until the first cut.

Topdressing a current lawn:

1. Put down some Turf Mix (roughly 25mm thick) to even out your lawn.
2. Apply Some CLS Premium Lawn Food. This will feed your lawn and give it a much greener colour.
3. Make sure your lawn has plenty of water as the grass grows up through the Turf Mix
